Summary

Professional WordPress Developer with over 10 years of experience specializing in custom plugin development and large-scale Multisite environments. Recent experience at Incsub (CampusPress and Edublogs) focused on Gutenberg block development, ensuring accessibility standards (WCAG), and performing enterprise-level code reviews. Passionate about building secure, high-performance web solutions through clean code and modern CI/CD workflows.

Experience

Incsub

July 2024 - February 2026

WordPress Developer • Remote • Full-time

- Developed custom Gutenberg blocks using ACF Pro and performed bug fixes and improvements for existing block-based themes.
- Built a custom 2FA security plugin from scratch and maintained a mix of in-house and third-party plugins, handling feature updates, bug fixes, and refactoring to address PHP deprecations.
- Implemented accessibility (WCAG) improvements across client sites to ensure both front-end and back-end interfaces were accessible to all users.
- Performed technical reviews of third-party plugins to identify performance and security issues and applied patches where necessary before integration into large-scale Multisite networks.
- Contributed bug fixes for Edublogs and implemented feature improvements for the CampusPress Flex theme.
- Used AI tools like Claude and GitHub Copilot to review client pull requests, helping to identify and fix code quality issues before they reached production.
- Set up client repositories in Bitbucket, configuring webhooks and SSH keys for automated AWS deployments. Used Pipelines to manage theme and plugin updates and apply patches.

MARYLINK.io • France

June 2016 - August 2024

WordPress Developer • Remote • Contract

- Designed and developed a complex social publishing platform with multi-step workflows for "Campaign" and "Publication" custom post types.
- Built a detailed permission system allowing different user actions (e.g., commenting, voting, rating) based on the workflow stage.
- Managed the platform's transition from the Kleo theme to BuddyBoss, integrating features with WP Ulike and wpDiscuz plugins.

- Refactored legacy codebases using OOP principles, namespaces, autoloading, and traits to improve maintainability and ensure the plugin remained scalable as features grew.
- Implemented unit and integration testing to ensure the stability of core plugin features.

King's Crest Global • Spain

February 2024 - April 2024

WordPress Developer • Remote • Contract

- Improved site performance by 60% (reducing load times from 22s to under 9s) by implementing script deferral, image optimization, and code minification.
- Customized WooCommerce PDF Invoice logic to display specific data based on different digital product types.
- Adjusted PayPal API integrations to remove unnecessary shipping requirements for digital-only products.

upnrunn technologies pvt ltd • India

May 2018 - October 2018

WordPress Developer • Remote • Contract

- Developed custom addon plugins for Gravity Forms to meet specific client requirements.
- Developed and launched the BP Events Calendar plugin on WP.org, creating a bridge between BuddyPress and The Events Calendar for front-end event management.
- Provided ongoing maintenance and feature enhancements for various client websites.

Upwork

November 2015 - Present

WordPress Developer • Freelance

- Developed custom plugins for various clients, including a booking plugin with Google Calendar synchronization and modules for Divi page builder.
- Customized Easy Digital Downloads (EDD) checkout systems and built addon plugins for WooCommerce, Advanced Custom Fields (ACF), and Gravity Forms.
- Provided long-term technical support and custom development for recurring clients.

Skills

Core Development: PHP (OOP, Namespaces, Autoloading, Traits, Interfaces), JavaScript (ES6+, jQuery), MySQL, HTML5, CSS3/SASS

WordPress Expertise: Gutenberg Block Development, WordPress Multisite, WooCommerce, Easy Digital Downloads, Accessibility (WCAG)

Frontend & Integrations: React, REST API, Stripe, PayPal

DevOps & Quality: Git/GitHub, CI/CD (GitHub Actions, Bitbucket Pipelines), Docker, Gulp, Webpack, Composer, NPM, PHPUnit, Jest

Projects

WCAPF - WooCommerce Ajax Product Filter

Developed and actively maintain a high-performance filtering plugin with 10,000+ active installations and consistent positive reviews on WordPress.org. Manage the full product lifecycle, including a premium version, user support, and ongoing optimizations to ensure compatibility with the latest WooCommerce and WordPress versions.

Certifications

Complete SQL Mastery
